

REDUCE, REUSE, RECYCLE

It's your future you're protecting!

We use natural resources to make the things we need, but the Earth's resources are limited.

A good way to look after the Earth's resources is to recycle.

Follow these tips to become a recycling hero.

At the shops

Buy products in packaging that is recyclable or that contains recycled material.

At home

Keep separate bins for recycling, organic materials and waste.

Ask your parents to take you to a recycling drop-off site.

Give your recyclables to a collector in your area.

When you are out

Put your recyclables into a recycling bin or take your recyclables home and put them into your separate recycling bin.

Never throw your precious recyclable materials into a normal dustbin!
