

10 BEST PRACTICES WHEN ADOPTING A CAT OR KITTEN

1. Prepare a safe and secure space for them.
2. Ensure you have enough stimulation, like toys and a scratch tree, to keep them busy.
3. Kittens and teen cats enjoy companionship, so consider adopting two if you don't already have one at home.
4. When travelling with your cat or kitten, carry them in a safe and secure pet carrier.
5. Once you're home with your new cat, keep them indoors for at least 3 weeks. This'll help them understand that they're in their new home.

6. Socialise them and help them familiarise themselves with the new environment and people.
7. Dedicate an adequate amount of time to train them to use their litter boxes. The more litter boxes you have around your home the fewer accidents you'll have to deal with.
8. If you are getting a collar for your cat, get a quick-release collar.
9. Feed your cat high-quality food with enough nutrients to help keep them healthy. Remember a happy cat is a healthy cat.
10. Veterinary care for your cat is very important. Vaccinate yearly and deworm regularly. Microchipping is important if your cat gets lost.
