

MEET THE BIG 5

ELEPHANT

Elephants can communicate over a large distance at a frequency that humans cannot hear.

RHINO

Rhinos have poor vision and will sometimes charge at trees and rocks, but they also have great hearing and sense of smell.

BUFFALO

Buffalo are protective of one another and will try to rescue another member who has been caught by a predator.

LEOPARD

Leopards are great at climbing trees and often safeguard their prey higher up to avoid it being stolen by other predators.

LION

A lion's mane gets darker the older he gets.
