## WHAT IS E-WASTE?

**E-waste** refers to **electronic** products which are **thrown away** or **no longer used**. This includes anything with **plugs, cords** or **electronics components** - like TVs, computers, cell phones, game consoles, battery-operated toys, or even electric toothbrushes!

## DID YOU KNOW THESE E-WASTE FACTS?

Share them with your friends and become an e-waste expert!

Less than one quarter of e-waste is being collected and recycled the right way<sup>(1)</sup>. Let's make sure we all work together and recycle more!

7.3 billion e-toys (like car racing sets, electric trains or talking dolls) are discarded every year - that's a lot of e-waste! Giving toys you no longer use to friends or repairing broken ones can be great ways to help reduce this.

Around a **BILLION** new cell phones are made every year! Recycling, donating or keeping your current phone for longer are all great ways to help reduce e-waste.

## LET'S TAKE ACTION & RECYCLE E-WASTE
