

# HAPPY WORLD AQUATIC ANIMAL DAY

Can you spot the myth about our amazing aquatic animals?

1. Coral reefs are alive

2. Whales blow water through their blowholes.

3. Octopuses have three hearts

# HAPPY WORLD AQUATIC ANIMAL DAY

## Answer

Whales do not blow water through their blowholes but instead exhale a powerful burst of air which creates a misty spray. This is because of the force of the expulsion and the condensation of warm, moist air meeting cold air.
